

OLATUNJI OTULANA

otulana.olatunji@gmail.com | 4165050861 | Brampton, ON L6V 3C7

Summary

Detail-oriented technology professional with over 10 years in telecommunications engineering and network operations. Adept at leveraging technical expertise and emerging analytics skills in SQL and Power BI to generate actionable insights. Committed to enhancing performance through data-driven decision-making and effective collaboration with cross-functional teams.

Skills

- Process optimization
- KPI tracking
- Data analysis & interpretation
- SQL
- Power BI
- Advanced Excel
- Data validation
- Root cause analysis
- Stakeholder communication
- Technical documentation
- Advanced Excel

Experience

Kingspan Insulated Panels | Bolton, Ontario

Production / Operations Associate
10/2019 - Current

- Operate in a high-volume, safety-critical production environment requiring strict adherence to quality standards and operational data accuracy
- Conduct inspections and quality checks to identify deviations and implement corrective actions based on observed data
- Collaborate with cross-functional teams to meet production KPIs and efficiency targets
- Follow structured procedures to collect operational data, ensuring consistency and compliance for effective performance tracking
- Maintain accurate production records and reporting documentation, facilitating operational decision-making and driving continuous improvement

Huawei Technologies Limited

Transmission / Field Engineer
12/2016 - 11/2017

- Performed fault diagnosis using transmission data, BER testing, sweep testing, and end-to-end performance analysis
- Integrated E1 links and supported IPRAN implementation to ensure seamless data flow and robust system connectivity
- Installed, configured, and tested telecommunications systems, ensuring performance accuracy through structured technical validation and data testing
- Monitored network performance indicators to enhance service reliability through ongoing system evaluation
- Produced comprehensive technical reports detailing test results, issues, and resolution outcomes for informed stakeholder decision-making

Blue Chip Communications Limited

Transmission / Field Engineer
10/2012 - 11/2016

- Resolved network performance issues through diagnostic testing and structured troubleshooting methods, enhancing overall service reliability

- Performed system testing on telecom and switching networks to identify faults and restore service performance
- Analyzed and resolved network performance issues using diagnostic testing and structured troubleshooting methods
- Conducted site surveys and gathered technical data to support enterprise and carrier client solutions
- Compiled technical documentation and service reports detailing findings and actions taken, facilitating informed decision-making for future improvements

Education

Computer Science | Olabisi Onabanjo University

Bachelor in Computer Science

2007

Attributes

- Analytical
- Detail-oriented
- Problem solver
- Safety-conscious
- Strong communicator
- Team-oriented
